

ZENITH Desorption and Electrolysis Unit features and technical data

ZENITH is one of the biggest manufacturers in aggregate processing machinery for the sand & gravel, quarry, mining, construction and recycling industries. Headquarter of ZENITH is located in Shanghai, China and now we have two manufacturing bases as our strong support. The equipment includes crusher, mobile crusher, conveyor, screening machine, sand washing machine, track mounted mobile crusher, crushing equipment, mill equipment, complete aggregate crushing equipment, **beneficiation equipment**, jaw crusher, cone crusher, impact crusher, complete quarry equipment, and so on. We will provide the right equipment according to the customer's requirements, and help customers to choose the location of the production line, equipment installation, training of workers, as well as on-site help and after-sales service.

This is ZENITH **Desorption and Electrolysis Unit** features and technical data:

Desorption and Electrolysis Unit Features

1. High desorption rate
2. High production capacity and low production cost
3. Cyanide free desorption
4. Barren carbon requires no dry heat re-generation
5. Carbon is conveyed by the automatic special non-destructive method. This conveyance process produces no powder carbon, carbon loss and gold loss
6. High degree of automation reduces the labor intensity of workers; cyanide free environment presents good working environment

Desorption and Electrolysis Unit Technical Data

MODEL	Capacity of per batch (Gold carrier carbon kilogram per batch)	Capacity of per day (Gold carrier carbon kilogram per batch)
5000	5000	5000-7500
4000	4000	4000-6000
3000	3000	3000-4500
2000	2000	2000-3000
1500	1500	1500-2250
1000	1000	1000-1500
800	800	800-1200
500	500	500-750
300	300	300-450
