

ZENITH Coating Machine features and technical data

ZENITH is one of the biggest manufacturers in aggregate processing machinery for the sand & gravel, quarry, mining, construction and recycling industries. Headquarter of ZENITH is located in Shanghai, China and now we have two manufacturing bases as our strong support. The equipment includes crusher, mobile crusher, conveyor, screening machine, sand washing machine, track mounted mobile crusher, crushing equipment, **mill equipment**, complete aggregate crushing equipment, beneficiation equipment, jaw crusher, cone crusher, impact crusher, complete quarry equipment, and so on. We will provide the right equipment according to the customer's requirements, and help customers to choose the location of the production line, equipment installation, training of workers, as well as on-site help and after-sales service.

This is ZENITH **Coating Machine** features and technical data:

Coating Machine Features

1. Continuous operation, large capacity, suitable for industrialized production in various scales
2. High use and less consumption of modifying agent, high covering and active index of powder, energy saving
3. Both modifying and dispersion function, suitable for any fine materials, special active effect for material with small proportion and big cubage weight like white carbon, mica powder and talcum powder
4. Powder and agent mixing and running in high speed and vortex, high modifying efficiency, with little change of granulate shape
5. Running in negative pressure working condition, air tight, no dust leakage, no pollution, good operation condition, low labor intensity
6. Operating in heat and cold conditions, no additional heating or cooling system required, easy operation

Coating Machine Technical Data

Model	CM30	CM60	CM90
Main Motor Power (KW)	18.5×3	37×3	75×3
Fan Motor Power (KW)	5.5	22	30
Spindle Speed (R/min)	4500	2700	2000
Capacity (KG/H)	500-1500	3000-4500	5000-7000
