

ZENITH HP Series Cone Crusher (Hydraulic) features and technical data

ZENITH is one of the biggest manufacturers in aggregate processing machinery for the sand & gravel, quarry, mining, construction and recycling industries. Headquarter of ZENITH is located in Shanghai, China and now we have two manufacturing bases as our strong support. The equipment includes crusher, mobile crusher, conveyor, screening machine, sand washing machine, track mounted mobile crusher, crushing equipment, mill equipment, complete aggregate crushing equipment, jaw crusher, **cone crusher**, impact crusher, complete quarry equipment, and so on. We will provide the right equipment according to the customer's requirements, and help customers to choose the location of the production line, equipment installation, training of workers, as well as on-site help and after-sales service.

HP Series Cone Crusher (Hydraulic) Features

1. High crushing ratio and production efficiency
2. Less spare part consumption and low operation cost
3. Better finished product shape
4. Hydraulic protection and hydraulic clearing, high automatization and less production stop and repairing time
5. Thin oil lubrication makes the service time increase
6. Manifold crushing cavity
7. Easy maintenance and operation
8. The crusher can provide customers a higher capacity, better product shape, and easy to be operated

HP Series Cone Crusher (Hydraulic) Technical Data

Model	Movable Cone Diameter (mm)	Chamber Style	Min Discharging(mm)	Max Feeding(mm)	Capacity (t/h)	Power (kw)	Machine Size(mm)
HPC220	1220	Coarse	19	210	185-300	220	2726×1950×2182
		Fine	13	105	150-210		
HPC400	1570	Coarse	30	290	400-500	400	3447×2830×2977
		Fine	16	135	260-400
